

Air Quality Monitoring	Testing of air quality at drilling/construction site.
Analytical Labs	Sample testing from wide area of operations in field.
Drilling- Rat Hole Driller	Drilling shallow pilot hole prior to drilling rig erection.
Flowline Construction	Horizontal pipelines used to connect oil & gas wells to larger primary pipeline "gathering lines."
Health and Safety Management	Work area oversight for construction and drilling operations. Provide safe work environment evaluations.
Midstream Operators	Buy, sell, and store hydrocarbon commodities such as gas & oil.
Oilfield Consultant – 3rd party (no direct supervision)	Third party consultant involved in permitting and job assessment. No direct supervision.
Refinery Contractors	Pipe and valve maintenance insulation and coatings work within refineries or plants.
Tank & Pipeline Cleaning	Cleaning/painting of pipes and tanks at jobsite or at client's construction yard.
Pipeline and Tank Integrity & Leak Detection	Visual, x-ray, and hydrostatic testing of vessels and pipes for possible pollution releases. Confirm no structural testing of non-pollution containing structures.
Site Remediation	Assessing site for contamination and providing remediation of soil and water at the site if needed.
Roustabouts	Unskilled labor used at oil/gas jobsite. Commonly hired to perform tasks such as cleaning jobsite, digging trenches, painting, and cleaning equipment.
Site Preparation & Beautification	Prepare drill site before drilling activity begins. Level ground, construct dikes and retentions ponds. Beautification is work completed after operations to return site to former state, erect fencing, and sound barriers.
Tank Installation – AST's	Above ground tank installation at drilling sites to contain items such as chemicals, condensate, and waste water.
Mudlogging	Consulting only, no rig control. Analyzing cuttings from drilling operations and advising the drill operator what type of rock they are drilling through.
Pipeline Construction, Consulting, Pigging, and Maintenance	Related to horizontal pip carrying hydrocarbons or chemicals over land.
