## PartnerOne Commercial Storage Tank Liability

The PartnerOne Commercial Storage Tank Liability policy provides coverage for cleanup costs at a tank owner's facility due to releases from scheduled tanks on the policy. Coverage is also provided for third party bodily injury and property damage claims emanating from scheduled tanks on the policy. Policies are written on a claims made basis.

Storage tank liability coverage is important because it provides legal defense for third party claims made against the facility owner. A policy/certificate satisfies federal and state requirements for financial responsibility, and in many cases, is required to conduct business.

A private Storage Tank Liability policy can offer a range of limits, deductibles, and coverages. Once a release is confirmed, claims are typically paid as soon as the insured's deductible has been met; making the insured's out of pocket expenses much more manageable. First Party Clean up, Third Party Liability, and Defense are always quoted and optional coverages, such as Business Interruption, Waste Transportation, Non-Owned Disposal Site Coverage, and other enhancements can be offered where applicable.

### Target risks:

- Auto/boat/recreational vehicle repair & maintenance facilities
- Gas stations
- Convenience stores
- Car/boat/recreational vehicle dealerships
- Golf courses
- Marinas
- Any location with a tank and/or backup generator such as a hospital, hotel, condo, school, municipality, or cell phone tower.
